Caution

ACETAMINE FLY BAIT: is a new bait insecticide for the control of house flies in several places.

Advantages:

- **ACETAMINE FLY BAIT** is an insecticide that provides an effective fly bait formula which encourages both male and female house flies to remain in treated areas and consume or contact lethal doses of the product.
- It can be use in Domestic Hotels, Kitchens, Food storage areas, Hospitals (excl. occupied wards),
- Military establishments, Poultry farms, Cattle stables, Municipal buildings, Refuse tips, Warehouses and Raw material stores.
- Its effectiveness, ease of use and extended life make it an ideal choice for everyone looking for an effective solution to their flying.
- Capable of controlling flies on a low base for extended periods of time, our bait offers convenience and effectiveness.

USES AND DIRECTIONS:

- Scatter bait from container or other convenient device, Use ACETAMINE Fly Bait inside and around areas where flies are a nuisance.
- Select place where flies stay or travel (around window frames, watering places, manure storage).
- If scattering on the floor is not possible, put the bait on a cardboard, plate.

Dose of Application:

- Scatter ACETAMINE FLY BAIT at the rate of 25 grams per 10 square meters of flies feeding area.
- Put the bait stations out of the reach of animals.

Frequency of Application

- This unique formulation affords the end-user up to 6 weeks of residual activity when applied according to label directions.
- Ready-to-use directly.

PUBLIC HEALTH INSECTICIDE FOR PROFESSIONAL USE

Use Directions:

- 1- Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.
