

Acetamine Ant Gel

Active Ingredient: Acetamiprid 0.05%

Treatment Rates For All Uses

Apply a minimum of 2 spots of gel per m².
An increased number of spots, up to 5 per m²,
may be required under conditions of heavy ant infestation
or where specific ant species predominate.

In some cases, a small, thin layer of gel bait,
3mm wide and 5 cm long, may be appropriate.
Several small applications of bait within an area
are more effective than 1 or 2 applications of
large quantities.

First Aid Measures

Eye contact: Rinse immediately with plenty of water, for at least 15 20
minutes. Immediate medical attention is required.

Inhalation: Move the victim to fresh air. Call a physician immediately.

Ingestion: If swallowed, seek medical advice immediately and show this
container or label. DO NOT induce vomiting.

Skin contact: Take off all contaminated clothing immediately. Wash off
immediately with plenty of water. If skin irritation persists, call a
physician.

Medical advice: there is no specific antidote available. Treat
symptomatically
