

KEEP OUT OF REACH OF CHILDREN

SERPENT MASTER: Snakes are beneficial in a multitude of ways, including keeping the rodent populations down, but snakes are also associated with fear and anxiety.

SERPENT MASTER is a granular repellent that is applied around the perimeter of the area to be protected. When snakes come in contact with the product they are deterred because it interferes with their sensory reception system. The snake flicks its tongue and places the forks of its tongue into the roof of its mouth where the Jacobson's organ is located. Scents and vapor molecules are picked up by the snake giving it very specific details of what is around it.

SERPENT MASTER temporarily shuts this sensory reception down, leaving the snake disoriented, causing the snake to leave the area to seek fresh air.

TARGET PEST: SNAKES

- SERPENT MASTER snake repellent is the only approved, university tested and patented snake repellent on the market today.
- SERPENT MASTER is Unique - only Snake Repellent in the World. Highly effective on poisonous and non-poisonous snakes! Effective repellent for 2 to 3 months—not destroyed by rain! University tested, Registered and a patented product.

As a snake approaches the product its sensory perception is alerted and the snake turns away leaving the area.

- When applied as directed, it is safe to humans, pets and the environment.
- It is a dry granular mixture which is easy to apply by lightly sprinkling around homes, cabins, trailers, camp sites, and garages.
- Normal rainfall will not harm the SERPENT MASTER.

RATE OF APPLICATION:

Application Rate	3.5 Acres	Residual	2 to 3 months
Ingredients	Napthalene, Sulfur	Indoor/Outdoor	Outdoor
